

MEASURING TIPS: Inside mount/outside mount

For:

Perfect-fit roller shade

Panel system

Inside Mount

An inside mount fits within your window frame. Please make sure your window frame depth is the same or greater than 2 3/8" (or 6 cm).

You don't need to make any adjustments to your measurements. We will do it for you.

For operating clearance, your blind will be made slightly smaller (about 1" or 2.54 cm) than the size you specify.

Outside Mount

An outside mount overlaps the window opening. For outside mount, we won't take any size deduction from your measurement. We will make your blind exact size you specify.
